

Adjuster Field Notes -- Water Damage (fictional)

Notes logged 2026-08-21

Site visit conducted 2026-08-20 following a reported pipe failure. Observed water damage to the kitchen flooring and lower cabinet panels. Moisture readings elevated in the affected area. No evidence of flood damage from an external source -- appears to be an internal plumbing failure.

Preliminary repair estimate discussed with claimant: approximately \$3,100.00, pending a contractor's written quote. Claimant advised to retain the damaged flooring samples for inspection.
